

Environmental Policy Statement

Astute Electronics will take all reasonable steps to drive towards a more sustainable, low waste future.

We have committed to continual improvement throughout our business to lessen our impact on the local and global environments by minimising waste, using recycled and renewable products wherever possible and working with our Suppliers and Customers alike to deliver best-in-class solutions.

We adopt the same approach towards minimising our energy use, working with innovative companies to lessen our reliance on fossil fuels, as demonstrated by the major, solar installation plan currently underway. Our Planet Mark certification demonstrates a clear desire and drive to reduce our emissions and waste.

Our employees are a key part of this approach and are actively engaged in helping the company achieve its waste reduction movement.
